

TO THE TEACHER -

You may adapt this book to your own special requirements, for each page has a perforation, which permits you to tailor-make your book into as few or as many sections as you need, considering . . .

- 1. the varying subjects you may teach, some requiring more marking pages than others.
- 2. the varying number of weeks in each report card period or semester period.

You will find a page for your own autumn and spring term schedules, plus seating plans and a page for notes in the book.
