

## Cocoon Swing

### Introduction

Kids will love feeling wrapped up (and gently rocked) in this cozy cocoon swing! Soft material tucks in the entire body for a relaxing deep sensory experience.

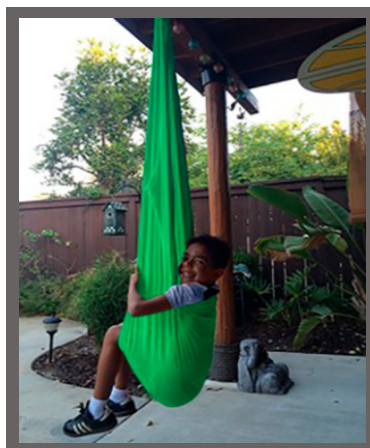

Providing deep touch pressure and gentle vestibular input, this swing makes the perfect sensory solution for a quiet reading and/or study space.

### Product Use

Swing is designed to be suspended from both metal rings, hung together, to create a teardrop cocoon.

Secure an anchor bolt to a structural beam in a standard 8 ft. ceiling. Use an appropriately sized chain or rope (not included) to lower the swing seat to the proper height which is dictated by the user's weight, needs and size. Entering the seat may require assistance as it will need to be pulled down to allow access.

Never install swing to hang higher than 16" from floor when in use.

Do not use with swing stands or as a hammock.

Maximum weight capacity is 120 lbs.

**WARNING: Risk of Injury. Supervision Required**  
Never leave child unattended. Hang only from a structural beam.  
Never install swing to hang higher than 16" from floor when in use.

### Care Instructions

#### Washing Options

- Machine wash in cold water on delicate cycle.
- Hand-wash by soaking and rinsing in cold water.
- Line dry.
