Benefits of brent® Potter’s Wheels

All welded steel construction for strength

Sealed bearing and hub assembly for water resistance

Seamless poly-v groove belt for smooth and powerful wheel head performance

High torque motor custom manufactured to brent® specifications

Automatic belt tensioner increases belt life and maintains maximum torque.

Modular design connections make upgrades and replacements easy.

Classic Controller keeps wheel speed constant under varying loads. On/off and forward/reverse toggle switches are sealed for protection. Electronic filters quiet operating noise.

Safety fuses are easily accessible.

Modular components keep maintenance simple.

Convenient foot pedal access for high speed and stop adjustments
